Please amend the claims 33, 25, 26, 19, as follows:

--28. In a driver-operated vehicle provided with a steering wheel region, vehicle radio entertainment deck components, and a vehicle cellular radio telephone for use by a driver in the vehicle, apparatus for enabling ~~the~~ driver, while seated at the steering wheel region of the vehicle, to access to ~~at least a plurality of~~ ^{Said} ~~a predetermined~~ components of the entertainment deck and also to access the cellular radio telephone, all in a diversionless manner with full attention to driving, said apparatus comprising separate control switches for turning said components on and off; a further control switch for enabling the activating and deactivating of the cellular radio telephone; and voice-controlled switching means disposed at said steering wheel region and programmed with a plurality of predesignated voice commands for operation of ~~said predetermined~~ components and also of the cellular radio telephone, the voice-controlled switching means being responsive to ~~the~~ ^{Said} driver speaking such predesignated voice commands live at said steering wheel region for thereupon effecting the activating of the corresponding control switch.--

--29. In a driver-operated vehicle provided with a steering wheel region and a vehicle cellular radio telephone for use by a driver in the vehicle, apparatus for enabling ~~the~~ driver, while seated at the steering wheel region, to access the cellular radio telephone in a diversionless manner with full attention to driving, said apparatus comprising a control switch for enabling the activating and deactivating of the cellular radio telephone; and voice-controlled switching means disposed at said steering wheel region and programmed with predesignated voice commands for the operation of the cellular radio telephone; the voice-controlled switching means being responsive to the driver speaking such ^a predesignated command~~s~~ live at said steering wheel region for thereupon effecting the activating of said control switch.--

--30. In a driver-operated vehicle provided with a steering wheel region and a vehicle radio-entertainment deck including one or more of storage-medium player, dictation recorder and AM/FM radio receiver components, apparatus for enabling a driver, while seated at the steering wheel region of the vehicle, to access ~~all of~~ ^{a predetermined} said components of the entertainment deck in a diversionless manner with full attention to the driving, said apparatus comprising separate control switches for turning each of said entertainment components on and off; and voice-controlled switching means disposed at said steering wheel region and programmed

2

predetermined

with a plurality of pre-designated separate voice commands for operation of said components; the voice-controlled switching means being responsive to the driver speaking such pre-designated separate voice commands live at the said steering wheel region for thereupon effecting the activating of the corresponding control switch--

amend the claims 23-25 and 19 as follows:

Please substitute the following:

a steering wheel region and
and radio

--23. In a driver-operated vehicle provided with a vehicle/entertainment deck including one or more of storage-medium player/dictation recorder and AM/FM radio receiver components, and a vehicle cellular radio telephone for use by the driver in the vehicle, apparatus for said enabling the driver, while seated at the steering wheel region of the vehicle, to access any a predetermined and all of said components of the entertainment deck and also to access the cellular radio telephone, all in a diversionless manner with full attention to driving, said apparatus comprising separate control switches for turning each of said entertainment components on and off; a further control switch for enabling the activating and deactivating of the cellular radio telephone; and voice-controlled switching means disposed at said steering wheel region and programmed with a plurality of pre-designed separate voice commands for the enabling operation of predetermined respective operation of each of said entertainment deck components and also of the cellular radio telephone; the voice-controlled switching means being responsive to the driver speaking such separate voice the respective pre-designed commands live at said steering wheel region for thereupon effecting the activating of the corresponding control switch--

a steering wheel and
said

--24. In a driver-operated vehicle provided with a vehicle cellular radio telephone for use by the driver in the vehicle, apparatus for enabling the driver, while seated at the steering wheel region, to access the cellular radio telephone in a diversionless manner with full attention to the driving, said apparatus comprising a control switch for enabling the activating and deactivating of the cellular radio telephone; and voice-controlled switching means disposed at said steering wheel region and programmed with pre-designed voice commands for the operation of the cellular radio telephone; the voice-controlled switching means being responsive to the driver speaking such pre-designed commands live at said steering wheel region for thereupon effecting the activating of said control switch--

a steering wheel region and
radio

--25. In a driver-operated vehicle provided with a vehicle/entertainment deck including one or more of storage-medium player/dictation recorder and AM/FM radio receiver components, apparatus for enabling the driver, while seated at the steering wheel region of the vehicle, to

access ~~any~~ and all of said components of the entertainment deck, all in a diversionless manner with full attention to the driving, said apparatus comprising separate control switches for turning ~~each~~ ^{any} of said entertainment components on and off; and voice-controlled switching means disposed at said steering wheel region and programmed with a plurality of pre-designated separate voice commands for the ~~respective~~ operation of ~~each~~ of said entertainment deck components; the voice-controlled switching means being responsive to the driver speaking the ~~respective~~ ^{such} pre-designed commands live at the said steering wheel region for thereupon effecting the activating of the corresponding control switch.--

--19. Apparatus as claimed in claim 18 and in which the initiation of said switching is effected by a driver-operated control located at the steering wheel structure. --

Please add the following claims 31-37:

--31. In a driver-operated vehicle provided with a steering wheel region and a vehicle radio entertainment deck including one or more of storage-medium player/dictation recorder and ~~AM/FM radio receiver~~ components, apparatus for enabling ~~the~~ driver, while seated at the steering wheel region of the vehicle, to access all of ~~said~~ components of the entertainment deck, all in a diversionless manner with full attention to the driving, said apparatus comprising separate control switches for turning ~~each~~ of said entertainment components on and off, and voice-controlled switching means disposed at said steering wheel region and programmed with a plurality of predesignated ~~separate~~ voice command for operation of said components, the voice-controlled switching means being responsive to the driver ~~speaking~~ such predesignated ~~separate~~ voice command live at the said steering wheel region for thereupon

--32. The apparatus of claim 31 wherein the vehicle also contains vehicle cellular radio

telephone for use by a driver in the vehicle, apparatus for enabling the driver, while seated at the steering wheel region, to access the cellular radio telephone in a diversionless manner with full attention to the driving, said apparatus comprising a control switch for enabling the activating and deactivating of the cellular radio telephone; and voice-controlled switching means disposed at said steering wheel region and programmed with predesignated voice commands for the operation of the cellular radio telephone; the voice-controlled switching means being responsive to the driver speaking such predesignated commands live at said steering wheel region for thereupon effecting the activating of said control switch to transmit over the radio telephone. - - -

~~--33.~~ In a driver-operated vehicle provided with a steering wheel region, vehicle radio *including recorder REC and player PL components* entertainment deck components and a vehicle cellular radio telephone for use by a driver in the vehicle, apparatus for enabling *the* driver, while seated at the steering wheel region of the vehicle, to access *at least a plurality of* said components of the entertainment deck and also to access the cellular radio telephone, all in a diversionless manner with full attention to driving, said apparatus comprising separate control switches for turning said components on and off; a further control switch for enabling the activating and deactivating of the cellular radio telephone; and voice-controlled switching means disposed at said steering wheel region and programmed with a plurality of predesignated voice commands for operation of said components and also of the cellular radio telephone, the voice-controlled switching means being responsive to *the* driver speaking such predesignated voice commands live at said steering wheel region for thereupon effecting the activating of the corresponding control switch. --

~~--34.~~ In a driver-operated vehicle provided with a steering wheel region and a vehicle cellular radio telephone for use by a driver in the vehicle, apparatus for enabling *the* driver, while seated at the steering wheel region to access the cellular radio telephone in a diversionless manner with full attention to the driving, said apparatus comprising a control switch for turning said components on and off; a further control switch for enabling the activating and deactivating of the cellular radio telephone; and voice-controlled switching means disposed at said steering wheel region and programmed with predesignated voice commands for the operation of the cellular radio telephone, the voice-controlled switching means being responsive to the driver speaking such predesignated commands live at said steering wheel region for thereupon effecting the activating of said control switch. --

--35. The apparatus of claim 34 wherein the vehicle is also provided with an entertainment deck including recorder REC and player PL components having separate control switches for turning them on and off; said voice-controlled switching means being also programmed with predesignated voice command for operation of REC and PL, and being responsive to said driver speaking such command live at said steering wheel region for thereupon effecting the activating of the corresponding said separate control switch. - -

--36. The apparatus of claim 33 wherein said predesignated voice commands enable simultaneous recording at REC and transmitting at TX over the radio telephone transmitter. - -
